## DESIGNED TO SAVE LIVES

We at Jalo Helsinki want people to fall in love with their fire safety products and let these essential everyday objects find their way into as many homes as possible. Safety can be beautiful. A beautiful fire safety product has no need to be hidden out of sight. A subtle yet stylish piece can be as good in attracting admiring eyes as the design sofa in your living room.

We invited top designers to imagine with us what fire safety can look like. Each designer has given their own unique vision and the result is delicious and rich in choices.

We are not satisfied with just making fire safety more attractive-looking, but we also want to enhance its usability. Installing Jalo Helsinki products takes mere seconds with no need for screws or a power drill. With our smoke alarms there are no tiny push buttons, but the whole external casing acts as a press switch for silencing false alarms and testing the performance of the product.

## KUPU 10

Kupu is sleek, composed and organic. The textile lining gives it a warm appearance. The smoke alarm also comes in a chrome-plated option.

10 Year lithium battery installed • Tested, certificated and awarded •  
Self testing technology • Fast installation with 3m tape or mounting  
screws • Automatic power activation upon installation • Easy  
maintenance with no battery changes ever
